

## **MANAGING OUR NATION'S FISHERIES**

The third *Managing Our Nation's Fisheries* conference is being held May 7-9, 2013 in Washington, DC. Conference organizers boast how the “conference follows up on the highly successful *Managing Our Nation's Fisheries* conferences held in 2003 and 2005,” which means of course you can expect to hear much of the same boring, tedious and self-aggrandizing doublespeak presented at previous conferences where nothing was accomplished. Show sponsors like *Pew Charitable Trusts* and the *Walton Family Foundation* who helped rewrite the law to stop you from fishing (while simultaneously creating a network of ‘no access’ marine reserves around the world) almost guarantee that this dog and pony show - like the last two - will completely gloss over the debilitating loss of angler access and devastating economics impacts to our recreational fishing community. If you're being forced to attend, whether at gunpoint, through mandates by bureaucratic bosses, or because you drew the short straw at your fishing club, be sure to bring along a few boards of *Fish Buzz Bingo* to add a little zip to this nonsensical three-day event!
